

Press Release from Ultrapolymers and Aquafil Engineering Plastics

For release on 14th May

Aquafil Engineering Plastics (Arco, Italy) are pleased to announce Ultrapolymers as a new distributor for their product range in the UK and Northern Ireland.

Ultrapolymers will focus on application developments with their customers utilising Aquafil's core product strengths:

- Speciality portfolio including semi aromatic, high modulus and impact modified grades
- Colour: full compound or XB patented technology
- Commodity PA6 grades
- Sustainability: the first UL Environmental accreditation for any recycled PA

David Viehoff from Ultrapolymers quotes "We are delighted to represent a company that meets our customer needs. AEP has an economic business and flexible plant setup capable of fast turn around for new developments, small lot orders and regular production. They are a forward thinking technical company with a flair for development. This partnership will be appreciated by current and potential customers alike".

Alessio Carminati, General Manager for Aquafil Engineering Plastics quotes 'It's an exciting time for Ultrapolymers and Aquafil Engineering Plastics. We will build on the excellent relationship we have established over many years with Ultrapolymers in East and Central Europe. Our first steps with them into West Europe will coincide with many new application based material and strategic developments we will be announcing in the near future'.

Aquafil Engineering Plastics is an integrated producer and compounder of polyamide. In addition Aquafil has a range of engineering plastics which it compounds at its headquarters in Italy. The Aquamid and Econyl PA compounds are complimented by Poliform POM, Acnor PPE/PS, Acarb PC and Carboloy PC/ABS.

Ultrapolymers Group is a European distributor headquartered in Belgium with offices and warehouses in most West and East European countries as well as Turkey and South Africa.
